

1935-36 Auburn Supercharged Speedster

Factory Upgrade Special Edition

Arguably one of the most dazzling automobiles ever built, Gordon Buehrig's inspired design has been a benchmark of beauty and grace for nearly a century.

In the thirties, Auburn boattail speedsters were well known as high-performance vehicles. While retaining the integrity of the original design, this Auburn drives like a modern high performance car—with an upgrade done by the Auburn-Cord-Duesenberg Company.

The Auburn-Cord-Duesenberg factory is releasing a limited number of original 1935-36 Auburns upgraded to supercharged speedsters with refined drive train and all steel bodies.

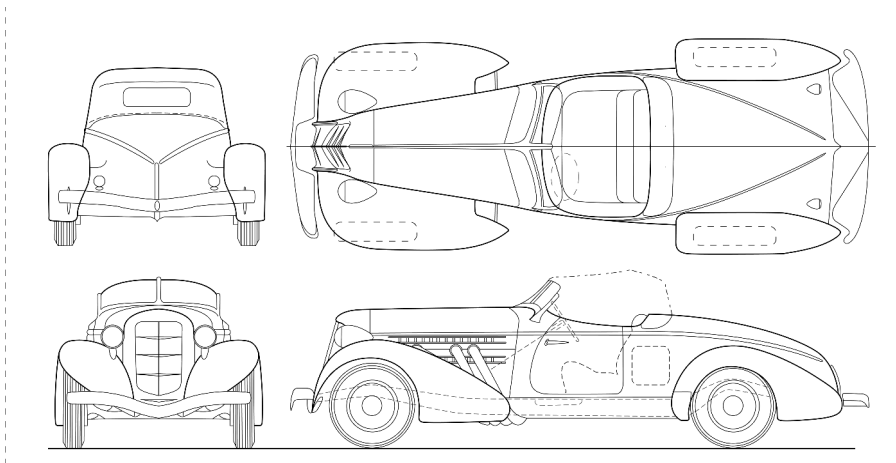

The factory upgrade adds to each automobile's provenance. The original 150 horsepower is increased to 250+ with a new supercharger providing 13.5 lbs of boost, aluminum billet, pistons and rods, as well as improved brakes and steering.

1935-36 fully restored originals have sold for \$1M.

The ACD Co. Auburn Supercharged Speedster upgrade version sells for \$750K.
